JOBSHEET I

KONSEP DASAR PEMROGRAMAN

1. Tujuan Praktikum

Setelah melakukan materi praktikum ini, mahasiswa mampu:

1. Mengimplementasikan pemilihan, perulangan, array, dan fungsi dalam kode program Java

2. Praktikum

2.1 Pemilihan

Waktu percobaan : 50 menit

Materi pada praktikum ini telah dijelaskan pada matakuliah Dasar Pemrograman, Sehingga didalam praktikum ini, tidak akan dilakukan langkah-langkah percobaan. Jawablah pertanyaan-pertanyaan yang ada berikut ini :

2.2.1 Praktikum Pemilihan

Pertanyaan

1. Buatlah program untuk menghitung nilai akhir dari mahasiswa dengan ketentuan 20% nilai tugas, 20% dari nilai kuis, 30% nilai UTS, dan 40% nilai UAS. Setiap nilai yang dimasukkan mempunyai batas nilai 0 - 100. Ketika pengguna memasukkan diluar rentang tersebut maka akan keluar output "nilai tidak valid". Ketika nilai akhir sudah didapatkan selanjutnya lakukan konversi nilai dengan ketentuan sebagai berikut:

Nilai Angka	Nilai Mutu		
	Nilai Huruf	Nilai Setara	Kualifikasi
$80 < N \leq 100$	A	4	Sangat Baik
$73 < N \leq 80$	B+	3,5	Lebih dari Baik
$65 < N \leq 73$	B	3	Baik
$60 < N \leq 65$	C+	2,5	Lebih dari Cukup
$50 < N \leq 60$	C	2	Cukup
$39 < N \leq 50$	D	1	Kurang
$N \leq 39$	E	0	Gagal

Jika Nilai Huruf yang didapatkan adalah A,B+,B+C+,C maka LULUS, jika nilai huruf D dan E maka TIDAK LULUS.

- Input dari program berupa komponen nilai tugas,kuis, UTS, UAS
- Otuput dari program “nilai tidak valid” jika nilai yang dimasukkan diluar ketentuan
- Output dari program berupa hasil nilai akhir, nilai huruf, dan keterangan LULUS/TIDAK LULUS

Contoh hasil Running program

```
Program Menghitung Nilai Akhir
=====
Masukkan Nilai Tugas: 85
Masukkan Nilai Kuis: 90
Masukkan Nilai UTS: 120
Masukkan Nilai UAS: 70
=====
=====
nilai tidak valid
=====
Mamluatuls-MacBook-Air:Praktikum
```

```
Program Menghitung Nilai Akhir
=====
Masukkan Nilai Tugas: 90
Masukkan Nilai Kuis: 40
Masukkan Nilai UTS: 75
Masukkan Nilai UAS: 85
=====
=====
nilai akhir : 74.0
Nilai Huruf :B+
=====
=====
SELAMAT ANDA LULUS
```

OUTPUT:

```
PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java selection07
Enter the assignment score: 20
Enter the quiz score: 30
Enter the midterm exam score: 60
Enter the final exam score: 50
=====

Student's Grade Analysis
Final Grade: 48.0
Grade Conversion: D (Less)
=====
Sorry, you didn't pass.
```

2.2 Perulangan

Waktu percobaan : 50 menit

Materi pada praktikum ini telah dijelaskan pada matakuliah Dasar Pemrograman. Sehingga didalam praktikum ini, tidak akan dilakukan langkah-langkah percobaan. Jawablah pertanyaan-pertanyaan yang ada berikut ini :

2.3.1 Praktikum Perulangan

Pertanyaan

1. Buatlah program yang dapat menampilkan deretan bilangan dari angka 1 sampai n kecuali angka 6 dan 10, angka ganjil dicetak dengan asterik "*", angka genap dicetak sesuai bilangan aslinya, dengan n = 2 digit terakhir NIM anda.

*bila $n < 10$ maka tambahkan 10 ($n += 10$)

Contoh:

Input NIM: 2341720102 maka $n=12$

OUTPUT : * 2 * 4 * * 8 * * 12

Contoh 2:

Input NIM: 2341720113 maka $n=13$

OUTPUT : * 2 * 4 * * 8 * * 12

Contoh hasil running program

```
Masukkan Nim :2341720102
=====
n : 12
* 2 * 4 * * 8 * * 12
```

OUTPUT:

```
PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java looping07
Enter your NIM: 2341760169
Number Series Output:
* 2 * 4 * * 8 * * 12 * 14 * 16 * 18 * 20 * 22 * 24 * 26 * 28 * 30 * 32 * 34 * 36 * 38 * 40 * 42 * 44 * 46 * 48 * 50 * 52 * 54 * 56 * 58 * 60 * 62 * 64 * 66 * 68 *
PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java looping07
Enter your NIM: 2341720102
Number Series Output:
* 2 * 4 * * 8 * * 12
PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java looping07
Enter your NIM: 2341720113
Number Series Output:
* 2 * 4 * * 8 * * 12
```

31             } else {
32                 System.out.print(i + " ");
33             }
34         }
35     }
36     System.out.println(); // Move to the next line after displaying the series
37 }
38 }
  
```

2.3 Array

Waktu percobaan : 50 menit

Materi pada praktikum ini telah dijelaskan pada matakuliah Dasar Pemrograman, sehingga didalam praktikum ini, tidak akan dilakukan langkah-langkah percobaan. Jawablah pertanyaan-pertanyaan yang ada berikut ini :

2.4.1 Praktikum Array

Pertanyaan

1. Buatlah program untuk menghitung IP Semester dari matakuliah yang Anda tempuh semester lalu. Formula untuk menghitung IP semester sebagai berikut :

$$IP \text{ Semester} = \frac{\sum_i (\text{Nilai Setara}_i * \text{bobot SKS}_i)}{\sum SKS}$$

Nilai setara didapatkan dari tabel konversi berikut ini :

Nilai Angka	Nilai Mutu		
	Nilai Huruf	Nilai Setara	Kualifikasi
80 < N ≤ 100	A	4	Sangat Baik
73 < N ≤ 80	B+	3,5	Lebih dari Baik
65 < N ≤ 73	B	3	Baik
60 < N ≤ 65	C+	2,5	Lebih dari Cukup
50 < N ≤ 60	C	2	Cukup
39 < N ≤ 50	D	1	Kurang
N ≤ 39	E	0	Gagal

Input dari program berupa nama matakuliah, bobot SKS, serta nilai huruf dari matakuliah tersebut.

Contoh Hasil Running Program

```

=====
Program Menghitung IP Semester

2.4 Fungsi

Waktu percobaan : 50 menit

Materi pada praktikum ini telah dijelaskan pada matakuliah Dasar Pemrograman, sehingga didalam praktikum ini, tidak akan dilakukan langkah-langkah percobaan. Jawablah pertanyaan-pertanyaan yang ada berikut ini :

2.5.1 Praktikum Fungsi

Pertanyaan

RoyalGarden adalah toko bunga yang memiliki banyak cabang. Setiap hari Stock Bunga dan bunga-bunga yang dijual selalu dicatat dengan rincian seperti berikut ini:

Baris = Cabang Toko, Kolom = Stock bunga pada hari x

	Aglonema	Keladi	Alocasia	Mawar
RoyalGarden 1	10	5	15	7
RoyalGarden 2	6	11	9	12
RoyalGarden 3	2	10	10	5
RoyalGarden 4	5	7	12	9

Rincian Harga Aglonema =75.000 , Keladi = 50.000, Alocasia =60.000, Mawar =10.000.

1. Buatlah fungsi untuk menampilkan pendapatan setiap cabang jika semua bunga habis terjual.
2. Buatlah fungsi untuk mengetahui jumlah Stock setiap jenis bunga pada cabang royalgarden
3. Jika terdapat informasi tambahan berupa pengurangan stock karena bunga tersebut mati. Dengan rincian Aglonema -1, Keladi -2, Alocasia -0, Mawar -5.

OUTPUT:

```
PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java function07
Income and stock for each branch after the reduction:
Branch RoyalGarden 1 - Income: 1970000
Flower stock at Branch RoyalGarden 1:
Aglonema: 9
Keladi: 3
Alocasia: 15
Mawar: 2

Branch RoyalGarden 2 - Income: 1660000
Flower stock at Branch RoyalGarden 2:
Aglonema: 5
Keladi: 9
Alocasia: 9
Mawar: 7

Branch RoyalGarden 3 - Income: 1300000
Flower stock at Branch RoyalGarden 3:
Aglonema: 1
Keladi: 8
Alocasia: 10
Mawar: 0

Branch RoyalGarden 4 - Income: 1535000
Flower stock at Branch RoyalGarden 4:
Aglonema: 4
Keladi: 5
Alocasia: 12
Mawar: 4
```

```

3. Tugas

Waktu pengerjaan : 100 menit

1. Susun program untuk membuat dua buah array berikut isinya sebagai berikut. Array pertama adalah array satu dimensi char KODE[10], berisi kode plat mobil. Array kedua, array dua dimensi char KOTA[10][12] berisi nama kota yang berpasangan dengan kode plat mobil. Ilustrasi tampilan array tersebut adalah sebagai berikut :

A	B	A	N	T	E	N						
B	J	A	K	A	R	T	A					
D	B	A	N	D	U	N	G					
E	C	I	R	E	B	O	N					
F	B	O	G	O	R							
G	P	E	K	A	L	O	N	G	A	N		
H	S	E	M	A	R	A	N	G				
L	S	U	R	A	B	A	Y	A				
N	M	A	L	A	N	G						
T	T	E	G	A	L							

Ketika pengguna memberikan input kode plat nomor maka program akan mengeluarkan nama kota dari kode plat nomor tersebut.

```

OUTPUT:

```

PS D:\cooleyah\smstr2\algorithm and data structure\assignment\jobsheet1\code> java assignment106
Enter the license plate code:
N
City for license plate code N is:
Malang

```

2. Buat program untuk menghitung rumus kecepatan, jarak, dan waktu

Berikut adalah persamaan untuk menghitung rumus tersebut :

Rumus Kecepatan

$$v = \frac{s}{t}$$

Rumus Jarak

$$s = v \cdot t$$

Rumus Waktu

$$t = \frac{s}{v}$$

Keterangan:

$v = \text{kecepatan}$

$s = \text{jarak}$

$t = \text{waktu}$

Program yang dibuat memiliki fungsi sebagai berikut:

- Menu (Untuk memilih rumus yang akan dihitung (kecepatan/jarak/waktu)
- Menghitung hasil perhitungan Kecepatan
- Menghitung hasil perhitungan Jarak
- Menghitung hasil perhitungan Waktu

Panggil fungsi-fungsi tersebut pada fungsi main!
